## THINGS YOU SHOULD KNOW ABOUT ZENOSS AND CISCO

### ONE

#### CISCO IS A ZENOSS CUSTOMER

Zenoss is the primary monitoring and management platform supporting Cisco's Managed Services for Data Centers. Zenoss provides certified coverage for Unified Data Center components: UCS, Nexus, VMware, EMC, NetApp FlexPod, VMDC (Virtual Multiservice DC) and ACI with dynamic real-time modeling.

### TWO

#### CISCO UCS PM IS ACTUALLY ZENOSS SOFTWARE

Cisco UCS Performance Manager (UCS PM) is software developed by Zenoss and rebranded by Cisco. While UCS PM is designed to manage UCS deployments, customers can also upgrade to the full Zenoss Service Assurance (ZSA) version to manage everything in the cloud and data center. [Read more...](#)

### THREE

#### ZENOSS PROVIDES THE ONLY INTELLIGENT SERVICE ASSURANCE FOR ACI

Zenoss builds on the foundational Cisco ACI elements to complete the picture. Zenoss extends the ACI policy model to provide end-to-end visibility, provide real-time analytics, and reduce new application time to production by 90 percent. [Read more...](#)

### FOUR

#### ZENOSS AND CISCO ACCELERATE NFVI DEPLOYMENTS

Cisco selected Zenoss to be the sole monitoring and analytics provider for Cisco's NFVI monitoring offering. The jointly developed solution accelerates software-defined networking deployments, with the primary benefit of enabling rapid modernization of infrastructure. [Read more...](#)

### FIVE

#### ZENOSS IS A MEMBER OF THE CISCO DEVELOPER NETWORK

Zenoss is a strategic Cisco partner and has been a member of the Cisco Developer Network for over seven years, working closely with Cisco technology groups to provide service assurance for enterprise customers and service providers.
