

Zenoss works with the world's largest organizations to ensure their IT services and applications are always on. As the leader in AI-driven full-stack monitoring, Zenoss uniquely collects all types of machine data, including metrics, dependency data, events, streaming data and logs, to build real-time IT service models that train machine learning algorithms to deliver robust AIOps analytics capabilities. This enables IT Ops and DevOps teams to optimize infrastructure performance, predict and eliminate outages, and reduce IT spend in modern, hybrid IT environments. Zenoss is recognized by industry analysts as a leader in AIOps and IT infrastructure monitoring.
